**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The independent claims mentioned above recite “processing captured digital data of **computed pixel**”. The step of computing pixel is not included in claims 1 and 8.

Accordingly, independent claims 1 and 8 and their dependent claims have not been treated on the merits.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Suggs (U.S. Patent No. 6,009,214).

Regarding claim12, Suggs discloses stagger sensors having sensing modules positioned

in parallel to a long axis, wherein a first light-sensing cell of a first sensing module and a second light-sensing cell of a second sensing module both have a first end on a vertical line in the same position along the long axis but each has a second end on a vertical line in a different position along the long axis (figs. 3a-3d, col. 3, line 37 through col. 4, line 5)

Regarding claim 13, Suggs discloses the stagger sensor of claim 12, wherein the first light-sensing cell has a vertical width along the long axis greater than any other light-sensing cell in the first sensing module (figs. 3a-3d).

Regarding claims 14 and 15 arguments analogous to those presented for claim 13 are applicable to claims 14 and 15.
